

AGRETO Hydraulic Scale

Applications

- Hydraulic scale for installation in single-acting lift cylinder with front-end loaders and forklifts
- Identification of loading rates and transport volumes

Technical details:

- Pressure sensor up to 250 bar
- Weighing indicator with stainless steel mounting Arm
- Waterproof Aluminium housing
- Power supply 9V Battery - 12 Volt cable
- Backlit E-Ink display, digit height 20 mm, clearly readable in every lighting condition, as seen on the picture
- Functions of weighing indicator: calibration, zeroing, taring, summing
- Continuously displays the weight of the load
- 3 m connection cable with waterproof plug connection
- 2 m cable for power supply
- Not officially calibratable
- Deviation in practical use up to +/- 2 %

Benefits:

- Simple and inexpensive scale for each hydraulic unit with single-acting hydraulic lift
- Easy installation
- Maintenance-free
- Weighs your load while working
- Allows optimal loading of vehicles
- Ideal for check weighing applications
